2	I had sent out an invitation to our survey technicians to join the professionals in the boardroom that was booked for this webinar. Although I would have thought that the subject matter was important to anyone who has access to corporate data, and uses the corporate equipment, it did not seem to have the same draw for these technicians. Perhaps topics more geared towards the practical side of surveying (i.e. the day to day workings of either the field or office/drafting aspect) might be more interesting to this group.	8/22/2019 8:55 AM

2	nothing to do with the webinar or its contents, but we have struggled to gain access to these webinars using our PSPC Government of Canada network, only to find out that we are not allowed to access the "go to meeting" website. We managed to do a work around using a public site outside of our internal network, but somehow I don't believe that we are the only Government organization experiencing this problem (NRCan, MTO, MNR, MGS ??).	8/22/2019 8:55 AM
